In the above example, we declared an array of size 10 bytes. Please note that index 0 to index 9 can used to refer these 10 bytes of buffer. But, in the next line, we index 10 was used to store the value 'a'. This is the point where buffer overrun happens because data gets written beyond the right boundary of the buffer.

Buffer Overflow Attack Explained with a C Program Example

Before the peaks – using data analytics to make the right decisions. Both predictive and retrospective data analyses are key in making fundamental decisions and defining logistics strategies. Complete transparency is the main advantage of having fully integrated software systems in a logistics installation.

Logistics Software: How to Make Handling Peak Times Easy

In this tutorial, we will learn to handle date & time in R. We will start off by learning how to get current date & time before moving on to understand how R handles date/time internally and the different classes such as Date & POSIXct/lc. We will spend some time exploring time zones, daylight savings and ISO 8001 standard for representing date/time. We will look at all the weird formats in ...

Logo Thanks to Julie Jung, clock has an amazing logo: What about lubridate? If you've ever worked with dates or date-times in R, you've probably used lubridate. lubridate has powerful capabilities for working with this kind of data. So, why clock? One of the primary motivations for creating clock was to improve on lubridate's handling of invalid dates and daylight saving time.
