Introduction to Computer Networks & Cyber Security, Chwan Hwa Wu, J.David Irwin, CRC press

Cryptography and Network Security

Cryptography is generally used to protect this information. The same principles apply to network security too. For anyone to secure data being transmitted over the network, they must use systems that use cryptographic algorithms. There are four basic cryptography principles which focus on network security.

Cryptography deals with various security
principles which are as follows:

Confidentiality - It specifies that only the
sender and the recipient or recipients
should be able to access the message.

Confidentiality will get lost if an
authorized person is able to access a
message.
