Chapter 6 Storm Sewer - Washington State Department of ...

A metropolitan area network (MAN) is a computer network that interconnects users with computer resources in a geographic region of the size of a metropolitan area. The term MAN is applied to the interconnection of local area networks (LANs) in a city into a single larger network which may then also offer efficient connection to a wide area network.

Metropolitan area network - Wikipedia

Frequency and transmission speed. The first popular wireless standard was the IEEE 802.11b which has a 2.4GHz frequency and a transmission speed of up to 11Mbps.. I remember back on 2004 when our technical team used to discuss the issues related to this standard when designing the metropolitan surveillance system, there was no professional wireless IP camera at that time.
