## Mental Health - VA Careers

0.6 units/kg/day or more for patients who are obese, on high-dose steroids or insulin-resistant. According to Dr. O'Malley, this formula tends to underestimate what patients' needs really are. "For very obese patients," she says, "some hospitals start out giving up to 1 unit per kilogram per day as their initial total daily dose.

## **Tips for calculating a total daily dose of insulin - Today ...**

BACK IN JANUARY, I wrote a cautionary column about the various financial pressures squeezing hospitals (“Stress test on economic trends”). I’m continuing the fiscal theme this month with a deeper look at payer mix. Payment differential Payer mix refers to the percentage of patients with government health plans — Medicare and Medicaid — vs. commercial or “private” insurance.

## **What's your payer mix? - Today's Hospitalist**

VA employees can choose from a variety of high-quality health care and life insurance options, as well as flexible spending accounts. Health care professionals at VA are protected by the Federal Government in cases of alleged malpractice, eliminating the need for personal liability insurance.

Dr. Death sounds like a horror story title. In the case of Christopher Daniel Duntsch, it’s a true horror story. Christopher Duntsch was an American doctor and specialized as a spinal surgeon—a deadly spinal surgeon—who killed three of his patients and maimed 31 others during a two-year span. Today, Duntsch is serving a life imprisonment [...]
