Windows Defender on client systems since Windows 8 have included both the antivirus and spyware engines and definitions. I'm not certain at what point the server versions of the operating system may have also included these, but since Windows Server 2008 was built from the same base as Windows 7 client, these would have been similar and contained only antispyware.

Windows Defender on Windows Server 2008 not picking up ...

I'm trying to get some more hands-on experience using Windows Server core and I'd like to promote a Server Core VM to a Domain Controller role in my homelab. I'd like for it to be licensed with a key I will purchase online, however it seems like a standard server 2016 key doesn't work.
